<http://dalumls.dk/english/>

Landbrugsvej 65, 5260 Odense S, Denmark

2nd Day - 10th of October 2017

"Project Efficient Virtual Innovation Communities"

2nd Day Workshop Case Study

"Competence Center ROBOFLEX Technology Collaboration Platform"

Workshop & Seminar Motivation

Globalization, Industry 4.0 and Internet of Things have put increased demand on how globally distributed and virtual organizations can meet challenges from new radical changes in technology, political trends as anti-globalization and disruptive business models. These challenges will be discussed in this combined workshop/seminar!

The form of the meeting is a combination of seminars and workshops guided by experienced coaches.

Workshop goals

The participants will learn from the exchange and development of concrete ideas, but also from how the group working process is executed. The participants will see how The virtual Project Office as a core node for knowledge exchange and execution of innovative projects and programs can be organized and designed

Workshop Agenda

Introduction & presentations of new research and experience from praxis, related to the focus area of the workshop

Open research and innovation communities- virtual project office services- an industry innovation ecosystem business case - **Competence center ROBOFLEX collaboration platform**
